9 South Bend Model A Tool Room Model. S/N 30353NAR9 Oct. 28, 1952 This lathe is in excellent condition for it's age including very close tolerances. South Bend Lathe Co.

As early as 1914, South Bend Lathe manufactured standard industry 9 inch lathes. In the early 20's, smaller lathes for students and apprentices were introduced, including a 9" Junior lathe, Catalog No. 22. The hole through the spindle, horsepower, and other overall dimensions were the same as the Workshop model, and prices, in 1931, were around \$300.

Although the code number of the headstock changes when supplied with a V groove pulley on a 9 inch lathe, or a 3-step cone pulley on the 16 inch lathe, the letter symbol designating the size and type of lathe stays the same, and is made in the model number as shown. Only the unit code stamped on the headstock changes:

South Bend 9-inch Lathe - Lathes.co.uk

The Model B and C South Bend 9-inch lathe used changewheels for screwcutting. The tumble-reverse arm had to be released by a square-headed nut before it could be moved to reverse the direction of rotation of the leadscrew. The earliest lathes, made in 1934, had a single-arm bracket and a simple "reversing" stud by which means an addition gear could be incorporated in the train to cut left-hand
