[What Is a Split System | Frigidaire HVAC](#)  
Split System Air Conditioners: A split system air conditioner can be paired with a furnace or an air handler. For residents in the Deep South, an air conditioner paired with an air handler can be the all-inclusive solution to your HVAC needs. Because having a gas furnace is not as important in these areas, you may not have to have one.

[How a Split System Heat Pump Works | Hunker](#)

The split system heat pump is a heat, air-conditioning and ventilation system (HVAC) divided between an outdoor unit and an indoor unit. The two units are connected through the house by copper piping. The outdoor unit houses a coil that acts as a heat exchanger and compressor. The indoor unit houses a coil and a fan.
