## CDC - Colorectal Cancer Screening Tests

People at an increased risk of developing colorectal cancer should talk to their doctors about when to begin screening, which test is right for them, and how often to get tested. Several screening tests can be used to find polyps or colorectal cancer. The Task Force outlines the following colorectal cancer screening strategies.

### Tests to Detect Colorectal Cancer and Polyps - National ...

In April 2016, the FDA approved this as the first blood-based test to screen for colorectal cancer based on its test characteristics. There is no evidence yet that this test can reduce deaths from colorectal cancer.

### Lab tests for Colorectal Cancer | CTCA

**Tumor marker tests:** This blood test may be used in addition to other tests for patients who are being treated for colorectal cancer. Tumor marker tests are used to check for two substances in the blood that colorectal cancer may produce: carcinoembryonic antigen (CEA) and CA 19-9. [Colorectal Cancer Screening Tests - American Cancer Society](#)

### Colorectal Cancer: Diagnosis | Cancer.Net

CEA is not a perfect test for colorectal cancer because levels are high for only about 60% of people with colorectal cancer that has spread to other organs from the colon. In addition, other medical conditions can cause CEA to increase. A CEA test is most often used to monitor colorectal cancer for patients who are already receiving treatment.
