Speed Control of Three Phase Induction Motor

A three phase induction motor is basically a constant speed motor so it's somewhat difficult to control its speed. The speed control of induction motor

Speed Control of Three Phase Induction Motor | Electrical ...

This will result in efficiency of three phase induction motor becomes 50%. If the stator losses are also considered, the air gap power dissipates in the rotor circuit at low speed. The speed of the three phase induction motor at low speed is not economical. The slip power dissipates in the external resistor in the slip ring induction motor.
