Hydraulic Wiper Seals - Rod Scrapers | Hallite

The Hallite 847 wiper has been specifically developed for cylinders used in demanding, heavy-duty off-highway applications in dirty environments, such as earth-moving excavators. This double-lipped wiper incorporates a special venting feature to permanently relieve pressure build-up between the rod seal and wiper.

Wiper seals - M&M Intercom

Wiper seals 40 Description Wiper rings are used to protect seals in sliding or reciprocating motions, preventing contamination from dirt particles (dust, mud, water, etc.).

The lip of the wiper removes even the first dirt from the piston rod. Such dirt particles can cause damage to hydraulic or pneumatic systems during stroke movement. SKF Wiper Seals | Seal & Design, Inc.

Wiper seals maintain sealing contact to the piston rod when the equipment is stationary (static, no reciprocating motion of rod) and in use (dynamic, reciprocating rod), whereas the tolerance for the rod diameter d is determined by the rod seal. Without a wiper seal, the retracting piston rod could transport contaminants into the cylinder.
